Re: Letter of Reference – CMS / Bearcan

To Whom It May Concern,

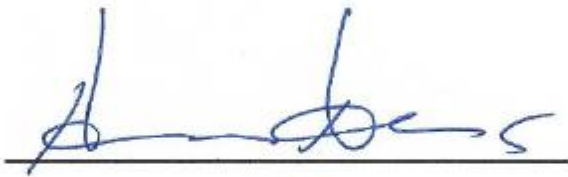

I am writing this letter to offer my enthusiastic recommendation CMS / Bearcan who served as the contractor on a panelized home construction project I managed in Chipman, New Brunswick.

From the very beginning, CMS / Bearcan demonstrated professionalism, deep knowledge of panelized building systems, and a strong commitment to quality & customer satisfaction. Their expertise in planning, fabrication, and on-site assembly was evident at every stage of the project. The process, which could have been overwhelming, was made smooth and efficient thanks to their proactive communication and problem-solving skills. One of the most impressive aspects of working with CMS / Bearcan was the precision and speed with which the homes came together. The panelized components were delivered and installed exactly as scheduled, with exceptional attention to detail and craftsmanship.

Not only was the final product a structurally sound, well built and attractive group of homes, but the experience of building them was also remarkably stress-free due to CMS / Bearcan's thoroughness and dedication. They were transparent in their cost estimates, responsive to questions and concerns, and willing to go above and beyond to ensure the satisfaction of the Client.

I would not hesitate to work with CMS / Bearcan again and wholeheartedly recommend them to anyone seeking a dependable and highly skilled contractor for panelized, rapid housing construction. Please feel free to contact me if you would like more information or specifics regarding the project I worked on them with and any questions you may have.
